Sakshi Verma

9811612386 | sakshiverma.h@gmail.com | LinkedIn | GitHub

EDUCATION

Vellore Institute of Technology
Bachelor of Technology in Computer Science and Engineering | ***CGPA**: 9.07* August 2023 – April 2027

SKILLS

Languages	Java, Python, JavaScript, SQL, HTML5, CSS3
Technologies	React.js, Event Handling, Responsive UI, Node.js, Express.js, PostgreSQL, MongoDB, JWT Authentication
Cloud	DevOps & AWS (Basics), Docker, Kubernetes, Linux, Git, GitHub, CI/CD
Core Concepts	Data Structures & Algorithms, Object-Oriented Programming (OOP), REST APIs, Database Management Systems (DBMS), Agile Methodologies, Data Analysis, Data Visualization

PROJECTS

AutoFlow Intelligent Workflow Automation Platform | *React.js, Node.js, Express.js, PostgreSQL, JWT* GitHub

- AI-powered workflow automation platform that transforms natural-language requests into structured multi-step workflows, reducing manual effort through intelligent task orchestration.
- Developed a full-stack application using React.js, Node.js, Express.js, PostgreSQL, and JWT authentication with 6 modular agents responsible for planning, execution, logging, analytics, and third-party integrations.
- Supports 5-stage workflow execution with real-time progress tracking and an analytics dashboard providing workflow history, execution status, agent performance, and failure insights.

Kubernetes Monitoring Dashboard | *React.js, Node.js, Express.js, MongoDB, Docker, Kubernetes* GitHub

- Cloud-native monitoring dashboard for visualizing the health and performance of distributed applications by tracking frontend, backend, database, and API services in real time.
- Integrated React.js, Node.js, Express.js, MongoDB, Docker, Kubernetes, and Server-Sent Events (SSE) to stream infrastructure metrics including CPU usage, memory consumption, API latency, request throughput, and database health.
- Provides automatic health monitoring with live status updates, enabling quicker detection of service failures and backend connectivity issues.

Stock Market Backtesting Engine in Python | *Python, Pandas, NumPy, Streamlit* Live Demo

- Python-based backtesting engine for evaluating quantitative trading strategies through realistic portfolio simulations and historical market data analysis.
- Designed a modular plugin architecture supporting multiple trading strategies with transaction costs, slippage, position sizing, and cost-basis tracking for accurate performance evaluation.
- Features an interactive Streamlit dashboard with 10+ visualizations, benchmark comparison, and detailed return and risk analytics for strategy assessment.

EXPERIENCE

Student Intern | Siemens Industry Software (India) Pvt. Ltd. May 2025 – June 2025

- Automated routine analysis tasks using Python and Bash scripts, reducing manual effort and improving workflow efficiency.
- Contributed to monitoring scripts that tracked system performance metrics and generated real-time alerts, helping reduce troubleshooting time by 50%.

Software Intern | Honda Cars India Ltd. May 2026 – June 2026

- Supported efficient issue tracking and customer problem management for the Honda Connect application, and resolved an average of 20+ tickets daily.
- Worked with the Honda Connect CRM system to analyze customer issues and assist the development team in resolving application tickets.

EXTRACURRICULAR

Japanese Language: Currently learning Japanese (Beginner Level).
Operational Lead, Software Development Club: Coordinated operations for 5+ technical events and workshops, collaborated with 30+ student volunteers, and supported the execution of coding and developer community initiatives.

CERTIFICATIONS

IBM DevOps, Agile, and Design Thinking Certification, Issued July 2025
Ethnus - AWS Certified Machine Learning Engineer - Associate Course, Issued July 2025
