EDUCATION

Vellore Institute of Technology August 2023 – April 2027

Bachelor of Technology in Computer Science and Engineering | ***CGPA: 9.07***

SKILLS

Programming	Java, Python, JavaScript
Development	React.js, Node.js, Express.js, REST APIs
Databases	PostgreSQL, MongoDB, Relational Database Concepts
Core Concepts	Data Structures & Algorithms, OOP, Software Engineering, Problem Solving, Agile/Scrum, GitHub

PROJECTS

AutoFlow – Intelligent Workflow Automation Platform | *React.js, Node.js, Express.js, PostgreSQL, SQL* GitHub

- Developed a full-stack workflow automation platform using React.js, Node.js, Express.js, and PostgreSQL to automate workflow execution, manage operational processes, and track execution history.
- Designed REST APIs and PostgreSQL data models to store workflow executions, outcomes, logs, and historical records, enabling structured management and retrieval of operational data.
- Built monitoring and analytics views to track workflow performance, identify recurring execution failures, and provide better visibility into operational processes.

Stock Market Backtesting Engine | *Python, Pandas, NumPy, Streamlit* Live Demo

- Developed a Python-based data analysis engine to process historical market datasets and evaluate quantitative trading strategies through portfolio simulations and performance analysis.
- Used Pandas and NumPy to clean, transform, and analyze datasets while calculating returns, risk metrics, transaction costs, slippage, and overall portfolio performance.
- Built an interactive Streamlit dashboard with 10+ visualizations and benchmark comparisons to identify performance trends and communicate analytical insights effectively.

QuickServe – Digital QR & Ledger System for Local Businesses | *React.js, Node.js, Express.js, PostgreSQL, Docker* GitHub

- Developed a full-stack web application using React.js, Node.js, Express.js, and PostgreSQL to digitize ordering, billing, and ledger management for local business operations.
- Built RESTful APIs and relational database workflows for managing products, customers, orders, billing, and transaction records across different business processes.
- Designed integrated customer, admin, and POS workflows for menu management, order processing, billing, and digital ledger tracking to streamline day-to-day business operations.

EXPERIENCE

Software Intern | Honda Cars India Ltd. May 2026 – June 2026

- Analyzed customer issue and application ticket data from the Honda Connect CRM system, handling 20+ tickets daily and identifying recurring application issues.
- Categorized application issues and supported troubleshooting by analyzing issue patterns and application behavior for the development team.
- Maintained structured issue records and used ticket trends to improve problem tracking, prioritization, and resolution workflows.

Student Intern | Siemens Industry Software (India) Pvt. Ltd. May 2025 – June 2025

- Analyzed model performance data, system logs, and internal test reports using Python and Bash to identify performance changes and software regressions.
- Automated data processing and report comparison workflows to evaluate performance metrics across software builds and reduce manual analysis.
- Generated structured performance reports and compared build results to identify regressions and areas requiring further investigation.

EXTRACURRICULAR

Hackathons: Reached Flipkart Grid Round 3, participated in Adobe Hackathon, Myntra WeForShe, and other college hackathons.

Operational Lead, Software Development Club: Coordinated operations for 5+ technical events and workshops, collaborated with 30+ student volunteers, and supported coding and developer community initiatives.

CERTIFICATIONS

IBM DevOps, Agile, and Design Thinking Certification – July 2025

Ethnus – AWS Certified Machine Learning Engineer - Associate Course – July 2025
