EDUCATION

Vellore Institute of Technology August 2023 – April 2027

Bachelor of Technology in Computer Science and Engineering | ***CGPA: 9.07***

SKILLS

Programming	Java, Python, JavaScript, SQL
Data Analysis	Pandas, NumPy,, Data Cleaning, Data Visualization
Databases	PostgreSQL, MongoDB, Database Management Systems (DBMS)
AI & Automation	Generative AI, Prompt Engineering, Workflow Automation
Software Development	Node.js, Express.js, React.js, HTML5, CSS3
Tools & Core CS	Git, GitHub, Object-Oriented Programming, Data Structures, Database Design

PROJECTS

AutoFlow – Intelligent Workflow Automation Platform | *React.js, Node.js, Express.js, PostgreSQL, JWT* GitHub

- Developed backend services using Node.js and Express.js, building REST APIs for workflow creation, execution, tracking, and integration management.
- Designed PostgreSQL database schemas and backend data models to manage workflows, users, execution history, analytics, and application state.
- Implemented workflow execution, logging, failure monitoring, and execution history to help users inspect results and troubleshoot failed workflows.
- Implemented JWT authentication and integrated backend APIs with the React.js frontend for secure end-to-end application functionality.

Stock Market Backtesting Engine | *Python, Pandas, NumPy, Streamlit* Live Demo

- Developed a Python-based quantitative analysis engine to process historical market data and evaluate trading strategies through portfolio simulations.
- Used Pandas and NumPy for data cleaning, transformation, feature calculations, and analysis while evaluating returns, risk metrics, transaction costs, slippage, and portfolio performance.
- Built an interactive Streamlit dashboard with visualizations and benchmark comparisons to evaluate strategy performance, risk, and historical trends.

QuickServe – Digital QR & Ledger System for Local Businesses | *React.js, Node.js, Express.js, PostgreSQL* GitHub

- Developed backend services using Node.js, Express.js, and PostgreSQL for digital ordering, billing, and ledger management, with a React.js frontend.
- Built RESTful APIs for managing products, customers, orders, billing, and transaction records using Express.js and PostgreSQL.
- Designed relational database structures and implemented application workflows for customer ordering, admin management, order processing, and digital ledger tracking.

EXPERIENCE

Student Intern | Siemens Industry Software (India) Pvt. Ltd. May 2025 – June 2025

- Developed Python and Bash automation scripts in a Linux environment to improve internal build monitoring, report comparison, and troubleshooting workflows.
- Built automated comparison workflows to identify improvements and regressions across internal build reports and generate consolidated HTML reports.
- Investigated system logs, outputs, and Linux environments to troubleshoot failures and improve the reliability of monitoring workflows.
- Reduced manual troubleshooting effort through automation of repetitive monitoring and reporting tasks.

Software Intern | Honda Cars India Ltd. May 2026 – June 2026

- Worked with customer issues and application tickets for the Honda Connect platform, handling an average of 20+ tickets daily.
- Analyzed and categorized application issues in the Honda Connect CRM system, identifying recurring problems and documenting patterns for the development team.
- Documented issue details and communicated findings to support efficient debugging, tracking, and resolution of application problems.

EXTRACURRICULAR

Hackathons: Flipkart GRiD Round 3; Adobe Hackathon; Myntra WeForShe; other college hackathons.

Operational Lead, Software Development Club: Coordinated 5+ technical events and workshops with 30+ student volunteers.

CERTIFICATIONS

IBM DevOps, Agile, and Design Thinking Certification – July 2025

AWS Certified Machine Learning Engineer - Associate Course – July 2025
